## **Customer Reviews**

Jerry Pallotta is an award-winning author of children's alphabet books and imaginative fiction. His books combine interesting facts, detailed research, humor, and realistic illustrations that mesmerize children everywhere.

I'm not sure if this book is trying to be hilarious, but it succeeds. The voice is very conversational, and not your typical kids book. It's certainly not boring. I wish at times it was a little more positive- it calls the octopus scary and another fish ugly, but I think that can be used as a discussion point during reading. . . My partner and I laughed through the whole book, so we will be looking into more

books by this author.

My preschool aged children who are learning the alphabet love this book. This is a must have for little ones. Very happy with this book.

My grandson's favorite Jerry Pallotta ABC nature book. Scientifically correct information with colorful illustrations makes this a fun way to learn about sea creatures of North Atlantic Ocean. Oh yeah and he practices his ABC's as we read.

My kindergarteners absolutely love this book! It quickly became a class favorite. Lots of interesting animals and good facts.

This whole alphabet series is great. My 5 yr. grandson was only interested in cars and trucks till he got the book of Dinosaurs. Now he wants all the books as they are widening his horizons.

My 3-year old loves this book already (we also like Bird Alphabet Book) and remembers the facts after one reading-- Bluefish has sharp teeth so don't put your fingers in her mouth;)...and so on. I disagree with another reviewer who thinks that the facts are too complex for preschooler. This is a very interesting book for both 3-year old and a parent and a good different way to review alphabet.

My 6 year old likes any book with pictures of sea creatures, but he is actually able to READ this book, he really enjoys reading this book to me.

We already had a copy of this but it was getting pretty ragged from use.
