## **Customer Reviews**

The finished picture examples in the back of the book look great and seemingly would be fun to color in. But I agree with the other reviewer that the pictures are intricate and involved. So many small, light printed, spaces with the color chart in small squares at the bottom of the page. Many of the color squares are difficult to distinguish for me, like the dark colors - navy, brown, greens & black. I have to refer to the finished examples in able to know what color to use, and sometimes that is not even enough to tell the color. Time consuming - it will take me at least one week to color one picture. I am disappointed because I was looking forward to fun, color-by-numbering of Star Wars pictures. It is an advanced, adult-style, but beautiful pictures when completed. So, this book is not easy and could be tedious, but the pictures are great.

I've had other color by numbers books that I loved and was really excited to get a Star Wars one. Unfortunately, I don't know how many I'll be able to complete, if any. The color code at the bottom has colors that are so similar, I wonder if there is actually a difference. If there is a difference, I have

no idea where you're supposed to find that many shades of grey! I really wish that they had foregone trying to be detailed and just had fun images.

This book is extremely hard...and to top it off, the pages are back to back so if you want to use markers, you wouldn't be able to. Therefore, my son has to pick between Dark Maul and Darth Vader. The designs are awesome, but the layout is bad. I wouldn't recommend this book at all and wish I could get my money back :(

When I first opened the book I was a little intimidated. But after taking the time to look through the book I was very excited to color it. I normally color Johanna Basford books so I enjoy doing small detailed work. This book is definitely challenging with lots of small spaces to color.

Yes, this is very detailed. I can understand why other reviewers are unhappy with it. However, to me the detail is the biggest highlight. Once completed these pictures are really stunning. It's not some cheap 2.99 coloring book for kids as it definitely more of a draw to the adult coloring crowd. You will need a large set of colored pencils ( looks like a 50 or 100 pack of colored pencils is the best bet since shading is used a lot so in some pictures you need like 3 different shades of grey or red or whatever) and patience but you are rewarded with relaxing activity to pass the day. Yes each picture will take some time to complete but wow they look really great. I really would love to see a Marvel version of this released

This is a fun challenging book! I love the color by number books especially when there's a challenge! The only thing that was disappointing was that the pages weren't single sided so the only thing you could really use are colored pencils...I love using my markers when I do color by numbers! This is why I rated it a 4 not 5....Besides that the pictures are awesome! Here's an example of one I'm in the middle of doing :)

The age range says 12-17 years. But most of these pictures are ridiculously intricate and involved, and I can't imagine most adults would desire to "color" this, let alone 12 year old. This was a disappointing purchase.
