get better info for free on YouTube. clicked "read for free" and received a charge for \$9.99. refunded the money.

Jones writes well and explains the hows and whys of growing hydroponically clearly.

You will do better to view Hydroponic tutorials on you tube. Save your money this pamphlet contains only the most basic information and not worth the shipping cost.

A simplistic look at several hydroponics methods. Has some very good information and also contains some dated info that is not as applicable in the state of equipment now available.

I got some grid tips, I've started a couple new hydroponic grow boxes, lots of fun!

Good but !!!

not what I expected it just have formulas I thought it told how to make the planters

Very basic.
