Where There Is No Doctor: A Village Health Care Handbook, Revised Edition

Synopsis

Hesperian's classic manual, *Where There Is No Doctor*, is arguably the most widely-used health care manual in the world. This 2015 updated reprint features updated medication information, a newly revised family planning chapter, new treatments for a variety of infections, and more. All Hesperian books are regularly updated and reprinted to reflect accurate medical information. Useful for health workers, clinicians, and others involved in primary health care delivery and health promotion programs, with millions of copies in print in more than 75 languages, the manual provides practical, easily understood information on how to diagnose, treat, and prevent common diseases. Special attention is focused on nutrition, infection and disease prevention, and diagnostic techniques as primary ways to prevent and treat health problems.

Customer Reviews

The Hesperian Foundation has been selling (this) Third World medical manual at a brisk pace for more than 25 years...(This) classic public-health text has meant survival for thousands in the Third World since the early 1970s, according to officials from the World Health Organization and the U.S. Peace Corps...it stands as arguably the most widely use public-health manual in the world, according to WHO...WHO officials noted that since 1978, it, too, has adopted the kind of community-based approach to health care exemplified by (*Where There Is No Doctor*). Both WHO and UNICEF now buy (the book) for their field offices... --Monica Eng, *Chicago Tribune*

consider *Where There Is No Doctor* my health bible. I carry it with me on every trip I take, and refer to it often.

The information provided in this book is simple, straight forward, and easy to read. I would highly recommend that any person planning to serve overseas have a personal copy for reference. --Anita Good, Mennonite Central Committee, Honduras

Where There Is No Doctor is an indispensable resource...This book has been, quite literally, a lifesaver for the poor even where there is a doctor. --Paul Farmer, Harvard Medical School; Co-Founder, Partners in Health

Home health care manuals are a dime a dozen, but this one is in a league by itself...This amazing manual...successfully brings together modern concepts of public health and personal health care into a usable and understandable format for the Third World villager. If you are a physician, dentist or nurse planning to volunteer on a medical mercy mission, review this book ahead of time and take it with you. --Annals of Internal Medicine, vol. 125, no.12

A biologist and educator by training, David Werner is a long-time health activist in village health care, and community-based rehabilitation. He has worked in more than 50 countries helping to facilitate health workshops and training programs, and has been a consultant for UNICEF, WHO, UNDP, and the Peace Corps, and has received awards and/or fellowships from the World Health Organization, the American Pediatric Association, the American Medical Writers Association, and the MacArthur Foundation.

Carol Thuman, RN, FNP, MS, works at the Alameda County Medical Center, specializing in women's health care. Jane Maxwell holds a master's degree in public health, and has additional training in both medical anthropology and journalism. Jane has worked in community-based health care settings in Mexico, Nepal, several countries in Africa, and with under-served urban communities in the United States.

This is a terrific book that was in my house growing up. I'm glad to see it is still in print.

Deals a lot with pediatrics but there is quite a bit that is good general advice.

This book is easy to read and makes a good addition to your library

a MUST have book for those that really want to be ready. Or will be spending time in a 3rd world nation.

Must have for... bush living.

A great resource for the book I'm writing. Conditions in the book are even more primitive than the ones involved in these instructions.

Great Book! Very informative.

I had a version of it 30 years ago. It still an awesome book
