What Was The Hindenburg?

Synopsis

At 800-feet long, the Hindenburg was the largest airship ever built--just slightly smaller than the Titanic! Also of a disastrous end, the zeppelin burst into flame as spectators watched it attempt to land in Lakehurst, New Jersey on May 6, 1937. In under a minute, the Hindenburg was gone, people jumping from windows to escape. However, only 62 of the 97 crew members and passengers onboard survived. The exact cause of the disaster is still unknown and remains a fascinating historical mystery perfect for this series.

Book Information

Lexile Measure: 0770 (What's this?)

Series: What Was?

Janet B. Pascal is an Executive Production Editor at Viking Children's Books and the author of *What Is the Panama Canal?*, *Who Was Dr. Seuss?*, *Who Was Maurice Sendak?*, and *Who Was Abraham Lincoln?*

What Was the Hindenburg? On Thursday, May 6, 1937, a crowd gathered in Lakehurst, New Jersey. They were there to watch the airship Hindenburg land. Although the ship had arrived in Lakehurst several times before, it was still a thrilling sight. The Hindenburg was the first flying ship ever to

carry passengers over the Atlantic Ocean to America. A little while before 7:00 p.m., the Hindenburg appeared. It was a kind of ship called a zeppelin. This is a large balloon on a hard frame, filled with a gas that is lighter than air. It floats through the sky like a helium balloon. To hold enough gas to stay up, zeppelins had to be huge. The Hindenburg was almost a sixth of a mile long. It was shaped like a tube with rounded ends. Its surface was a shining silver. Despite its size, it floated lightly and quietly through the air, as much at home as a fish in water. As it began to sink gently toward the airfield, it was a beautiful sight.

This set of non-fiction books is perfect for reading with unmotivated readers. The topics are interesting, the vocabulary is defined in context and the material is rather riveting because it actually happened. I like to use them with children when I tutor.

This book was very well written and intriguing for my son. He had to come up with ten interesting facts for a class assignment, and the things he related were new and interesting to me-- and I'm an avid reader of this type of history.

The students in our school LOVE this series! (They also love the "Who Was..." series. It's so good to see kids excited about good books that teach them something worthwhile as opposed to junk. I just wish the entire series was available in hardcover.

I liked it because it told me some good facts about the "HENDENBURG". It was a nice and kinda easy to read but the good thing about it was it told a big part of world history.

Wonderful book to read to our 6 year old to teach history in a fun way!

really a good read covering the Hindenburg. Lots of history, stories, and some pictures.
