Best Sellers Rank: #17,826,789 in Books (See Top 100 in Books) #29 in [Books > Medical Books > Veterinary Medicine > Urology](#)

Customer Reviews

"This publication is worth the cost. It is an excellent handbook for clinical pathologists teaching urinalysis." -- Veterinary Clinical Pathology 2000; 28(4):146, Denise Bounous, DVM, PhD; Safety Assessment at DuPont Pharmaceuticals; Newark, Delaware"With excellent photographs, diagrams and tables, this handbook provides the essentials for routine urinalysis. A must for clinicians and technicians." -- David F. Senior, BVSc., Dipl. ACVIM, Dipl. ECVIM-CA; Chair; Department of Veterinary Clinical Sciences; School of Veterinary Medicine; Louisiana State University at Baton Rouge --This text refers to an out of print or unavailable edition of this title.

Dr. Dennis J. Chew is a Full Professor in the Department of Veterinary Clinical Sciences at The Ohio State University College of Veterinary Medicine in Columbus, Ohio, where he has been employed for over 25 years. He is an Attending Clinician in the Veterinary Medical Teaching Hospital and is Service Head for an internal medicine ward. Dr. Chew is board certified by the American College of Veterinary Internal Medicine (internal medicine specialty). He is active in teaching in both the classroom and clinics and conducts research activities related to the urinary tract of dogs and cats. Dr. Chew has authored numerous scientific papers and written extensively in textbooks relating to the urinary tract. Dr. Chew is especially interested in lower urinary tract disorders of cats, cystoscopy, progression of chronic renal failure and its prevention, acute renal failure, and disorders of calcium balance. Dr. Stephen P. DiBartola received his DVM degree from the University of California, Davis in 1976. He completed an internship in Small Animal Medicine and Surgery at Cornell University in Ithaca, New York in June 1977. He was a resident in Small Animal Medicine at The Ohio State University College of Veterinary Medicine from July 1977 to July 1979. He was Assistant Professor of Medicine at the University of Illinois College of Veterinary

Medicine from July 1979 until August 1981. In August 1981, Dr. DiBartola returned to the Department of Veterinary Clinical Sciences at The Ohio State University as Assistant Professor of Medicine. He was promoted to Associate Professor in 1985 and to Professor in 1990. He received the Norden Distinguished Teaching Award in 1988 and completed a textbook entitled Fluid Therapy in Small Animal Practice currently in its second edition (published by W.B. Saunders Co.). Dr. DiBartola currently serves as co-editor-in-chief for the Journal of Veterinary Internal Medicine. Dr. DiBartola's clinical areas of interest include diseases of the kidney and fluid, acid-base, and electrolyte disturbances. His areas of research interest include reactive systemic amyloidosis and two familial renal diseases of cats, familial amyloidosis of Abyssinian cats and autosomal dominant polycystic kidney disease in Persian cats. --This text refers to an out of print or unavailable edition of this title.

This book is a must have for the clinician and technician doing frequent in house UA's. There are good illustrations and explanations of the most common pathology found in daily samples. However, there is NOT a good layout of ALL of the basic crystals found in urine sediments, but most of the common crystals are featured. Case studies found near the end of the book really come in handy for interpreting samples as related to patients.
