Symmetric Passing: Club Passing Rhythms For Two, Three, And Four Jugglers

Synopsis

The ultimate reference for numbers club passing and interesting passing rhythms, Symmetric Passing turns you into the juggler who knows how all the rhythms work. This book is a great place to start for beginning club passers, with sections on five and six clubs for two jugglers. Experienced club passers will enjoy popular rhythms like WhyNot and Popcorn, and over one hundred other passing rhythms. You don't need to learn any crazy juggling notations because every rhythm is broken down into specific instructions for each juggler. Don't worry, siteswaps and causal diagrams are still included, and there is a primer on each in case you want to use those notations. Symmetric Passing is the book you want to pull out the next time some one asks you, "Wanna pass?"

Best Sellers Rank: #3,734,804 in Books (See Top 100 in Books) #51 in [Books > Sports & Outdoors](#) > Individual Sports > Juggling

Customer Reviews

Matthew Wise is an avid juggler and club passer. He learned to juggle with the Vassar College Barefoot Monkeys and has since juggled with the University of Maryland Juggling Club, the Madison Area Jugglers, and the Princeton University Juggling Club.

This book is a wonderful resource for jugglers interested in taking their club passing to the next level. It is full of non-standard patterns with an easy to follow organization and a clear explanation of each pattern. Knowledge of siteswap notation will increase your understanding and appreciation of where the patterns come from but it is not a central part of the teaching method so you don't need to know it. I immediately began integrating these patterns into my juggling club's normal repertoire and would recommend that every club have at least one copy in case you find yourself standing around asking yourself, "Hey guys, let's try something new. Anyone have any good patterns?" Be sure to

take the time to read and take the time to understand the appendices in the back if you are not used to reading causal diagrams. Great job, Matt!
