Wizard

Synopsis

Intellectual Sophia Bennett knew what kind of man she wanted: a rugged cowboy. And in Texas they were everywhere! So why couldn't she take her eyes off brilliant professor Max Travers? He was a Wizard in mathematics who surely made love by the numbers. Yet every inch of him — no Stetson, no dusty boots — added up to dangerously sexy.

Customer Reviews

Jayne Ann Krentz is the author of fifty New York Times bestsellers. She has written contemporary romantic suspense novels under that name, as well as futuristic and historical romance novels under the pseudonyms Jayne Castle and Amanda Quick, respectively. She lives in Seattle.

I just love this authors books. Her books are so good , you just can't wait to see what happens next. the plots are always interesting, The characters are strong and interesting. I have a bookshelf full of her books and have never been disappointed in them. I liked how this book showed the girls prejudice about educators/ professors and how he went about changing her opinion. I like the fact that this book is one you just don't want to put down to you finish it. I find that with all her books. The person narrated the story was very good.

It started a little slow for me..but after the third chapter...better. and by the 5th chapter I was hooked. A nerd with a black belt and good looks..deadly combo!

This book shows the earlier writing style of the author. I liked the story base as I do all of Krentz books. The only negative about it is the same problem played over and over.

I wish when they remake these books they edit them for a new and updated audience. Less than what I expect from Jayne in the present.

Already had this under different cover combined with something else. I hate when this is done. It's very misleading. This was an ok book. Not one of her best.

It came in handy when needed for spouse with eye problems. It played on the portable CD player just fine.

different and unusual subject. it was ok

Sophia Bennett grew up among geniuses, knowing she did not fit in. After graduating from college, she broke free of the ivory tower, living life to the fullest. Working toward her dream of a designer boutique, Sophia has settled in Texas. She wants cowboys and excitement, not intellectual wizards. Wizards like Dr. Max Travers, professor of mathematics and friend of Sophia's parents, another genius whose life is staid and refined. Max sees Sophia as the box of crayons he was never allowed as a child. He wants all her color and life and excitement. All he has to do is convince her that he can be passionate about more than mathematics. An early Jayne Ann Krentz, it is a delightful read. Max is not one of her typical Alpha males, but is still all man. He rescues Sophia from an abusive cowboy, maneuvers himself into her life, and is supportive of Sophia's dreams and schemes.
