

The book was found

Optical Fiber Communication Systems (Artech House Optoelectronics Library)

Synopsis

Offers insight into the characteristics, applications, advantages and limitations of new associated optical fibre technologies. The text also provides the practical details and mathematical tools necessary to analyze and design optical fibre systems.

Book Information

Series: Artech House Optoelectronics Library

Hardcover: 565 pages

Publisher: Artech House Publishers (October 31, 1996)

Language: English

ISBN-10: 0890067562

ISBN-13: 978-0890067567

Product Dimensions: 6.1 x 1.5 x 9.2 inches

Shipping Weight: 2.7 pounds (View shipping rates and policies)

Average Customer Review: 4.0 out of 5 stars 2 customer reviews

Best Sellers Rank: #827,892 in Books (See Top 100 in Books) #26 in [Books > Engineering & Transportation > Engineering > Electrical & Electronics > Fiber Optics](#) #302 in [Books > Science & Math > Physics > Optics](#) #1338 in [Books > Literature & Fiction > History & Criticism > Books & Reading](#)

Customer Reviews

Currently a professor of electrical engineering at Stanford University, Leonid Kazovsky's career has involved extensive research in wavelength division multiplexing, high-speed optical networks, analog links, phased-array radar, and non-linear effects in optical fibers. He earned his M.S. and Ph.D. in electrical engineering from the Leningrad Institute of Electrical Communications. Sergio Benedetto is a professor of Trasmissione Numerica at Politecnico di Torino, Italy, where he also earned his Ph.D. in electrical engineering. Dr. Benedetto is currently researching coding theory and digital communications over optical fibers. Alan Willner is a professor at the University of Southern California and is a former postdoctoral member of the technical staff at AT&T Bell Laboratories. He earned his B.A. in Physics from Yeshiva University and his M.S. and Ph.D. in electrical engineering from Columbia University.

It is a nice book and it was delivered as quickly as possible. I am satisfied with it.

Extensive theoretical coverage of the subject. The excessive use of acronyms makes it almost impossible to study without interruption. The lack of a list of acronyms is sour. Would like to see more experimentally oriented treatment of actual physical implementations to supplement the theoretical equations.
