I am in Government Contracting and this book is very informative and can be used as a ver good tool. Also in reference to the review talking about spelling errors, I'm not sure how old your dictionary is but "definitized" and "estopped" are words. Check Merriam-Webster, Online m-w.com.

This book was written for quick reference only. I was not impressed. It was written well, but boring. I did learn from, but I wish I would have tried something different.

The book is certainly packed with a lot of valuable information, and I suggest purchasing it if you plan on writing any government proposals, or managing government contracts. Just be prepared to filter through a lot of bad editing, spelling errors, sentences that make no sense, incorrect wording that render the sentence incorrect, and, at certain times, words that do not exist. For example, the word "definitized" appears many times; and I don't think the government has ever "estopped" invoking ceiling price limitations. It just seems unbelievable that a book in its fourth edition could be so riddled with obvious errors - especially in this day and age when spell checks and grammar checks are built in to even the most basic of writing and publishing tools. All in all, you'll obtain some new knowledge, just be prepared to spend some time reading, and re-reading certain sentences and paragraphs to make sense out of them.
