Gregory Vogt has written many books about Earth, space, and space exploration, including several for children and young adults.

This book got my 4 year old hooked on planets. We read it at night and since he's got a shorter attention span, we stick to the main parts of the book but as he gets older I imagine he'll enjoy some of the more detailed information in the insets also. He can now identify all the planets and recently asked for his room to be redone with planets and stars. It's a hit.

My son likes this book, but it is kind of basic. Even though he is just 4 1/2, he wants more detail. He

is very into the solar system and wants all the info. He was disappointed that the dwarf planets were not included.

Great book to teach higher level stuff about our solar system!

Grand kids love it.

great book

My recently turned 5 year old is what I call an advance reader for her age. She loves it.

Such a great read, easy to understand and fun to read

The national geographic level 2 and 3 readers have made reading so much more fun!
