Is Religion Irrational?

Synopsis

Straddling the boundaries between science, religion, and philosophy, this book is essential reading for anyone interested in the current cultural war between atheism and belief. A wide ranging and informed discussion that addresses the key questions raised by the New Atheists, this engaging and stimulating read debunks the notion that rationality and intelligence are incompatible with belief in God. If the New Atheists are to be believed, religious belief is dangerous and irrational. With increasingly intolerant polemic they are dismissing the views of religious people, and misconstruing them in the process. Written with wit, style, and clarity of meaning, this book directly addresses many of the main criticisms raised by the New Atheists; such as Does God cause evil? Is the universe intelligently designed? Is God free?; and is an indispensable read for anyone interested in the arguments for and against religious belief.

Customer Reviews

"Although he lacks the glibness, arrogance, and fame of best-selling antireligionists Richard Dawkins, Sam Harris, and Christopher Hitchens, Ward neatly cuts the ground from under such global-village atheists." —Booklist on *Is Religion Dangerous?* "An impressively insightful and well-balanced survey of major questions for science-and-religion dialogue. . . . Writing as a scholar of world religions, Ward discusses multiple traditions at a level of depth and detail that exceeds the normal standards of the science and religion literature." —Publishers Weekly, 4-starred review, on *The Big Questions of Science and Religion* "Ward, with humor and skill, deftly and accurately guides us through the ages of reflection on what can and cannot be

known about God. . . . This book inspires considerable thought and thus belongs in every library." [Library Journal on God: A Guide For the Perplexed](#)
