Synopsis

Because of the increase in serious kidney diseases, including end-stage renal disease, your role as a nephrologist, intensivist, surgeon, or critical care physician is quickly expanding. Well received in its 1st edition, this 2nd edition continues to provide comprehensive coverage of the latest advances in critical care procedures for the adult or pediatric patient with renal diseases or disorders. Presents a common language and standardized guidelines to help multi-disciplinary physicians caring for the critically ill communicate more effectively. A new US editor, detailed discussions of different forms of organ support, artificial organs, infections, acute illness occurring in chronic hemodialysis patients, and much more make this book an exceptional resource for anyone who treats critically ill renal patients. Presents a multi-disciplinary and international approach to critical renal care for a thorough and integrated presentation of how to care for critically ill patients with renal disease or complications. Addresses the full range of renal problems, from epidemiology to monitoring and diagnostic procedures to pathophysiology of organ systems in relation to kidney failure. Provides details on different forms of organ support, including liver, lung, and cardiac therapy. Defines common guidelines in nephrology and critical care medicine for better communication among clinicians. Places a special emphasis on therapeutic interventions and treatment procedures for a hands on clinical reference tool. Features a new US editor, Dr. John Kellum, who incorporates his expertise in critical care medicine to the 2nd edition and extends the breadth of coverage with a North American perspective. Discusses new techniques in the field providing you with a comprehensive review of the experimental and clinical work being done. Customer Reviews

"Critical Care Nephrology still continues to provide an impressive up-to-date comprehensive coverage. This book undoubtedly is of great value for all physicians who deal with critically ill patients and renal failure and is therefore highly recommended." Netherlands Journal of Critical Care, December 2009

All the topics that I have read so far are well organized, comprehensive and excellent. I think it is an essential text for anybody working in the ICU.

It covers all the gaps of info and advice in critical patients. It is a must have book for every Nephrologist who gives attention to critical patients.
