"...the book as a whole can be recommended to all students and others coming to the subject with only the barest of basic legal knowledge."--New Law Journal --This text refers to an out of print or unavailable edition of this title.

Martin Dixon is a Fellow in Law at Queens' College, Cambridge, and a Reader in Law at the University of Cambridge. He has been a legal officer for the United Nations in Vienna, advises companies on questions of international law, and is co-author of Cases & Materials on International Law.

Very clear and well presented, this is a textbook of high stature amongst the large body of works in this field

You cannot go wrong with this book when dealing with international law. The language is simple, clear and to the point. The chapters are thorough enough and cover topics such as Law of the Sea, State Immunity, Diplomatic Immunity, Sources of Law . . . all topics which are currently included in my school's International Law course. This book was recommended to me by a professor and it has lived up to my expectations.

Although the delivery was late, the book is good and well packaged. I recommend it to others for use

It is written and organised very poorly

As promised!

The book was decent but really boring. Too many facts and not enough opinions. I would rather read the ingredients to a twinkie!

This text book is very much in touch with recent world changes as it relates to international law. It cover most of the topics expected in an undergraduate law course. The section on Human rights is a good start, however, human right is an area of law that is coming into its own and will require greater treatment in future editions. The text is clear, lucid and quite easy to understand.
