Customer Reviews

The first book is quite the eye opener despite the FUD-like title. The reality is that crazy things could happen to the world and it's really going to suck if we have no resources to fend for ourselves. This book tries to drum up the possibility and does its very best in springing us to action by offering all sorts of survival tips. It isn't just on the financial side either. It also encourages fine ideas like growing your own crops. It doesn't specifically teach how to go about these things but to me, spreading awareness is enough and it makes for a great reference material. More of the how-to stuff can be found on the second book which focuses on getting rid of debt. It's pretty straightforward but also very detailed discussing stocks and many money-saving tips. Together both books offer a killer value! I am a happy owner indeed.

I enjoyed reading this book. The subject of death of money is fascinating. Edward Rickards does a great job explaining how this collapse could happen. The book is divided in two main part. The first one explain all the events that could lead to an economic melt down and the second one deals with how to survive such an event. I really appreciated the chapters on what you need to start stockpiling now and what skills to develop so you can survive the collapse if it happens. There is also a section on barter which was very informative.

For people who want to save money, there are good tips for you here. However I think these are just basic tips, but I think it will be very helpful for beginners. And will be a good refresher for those who forgot these tips.

Pretty interesting book that change my perspective about money. Really enjoyable read as it was written in an easy to follow read manner. Definitely recommend this book to my friends!

I love reading about where my money goes, this book is a great read for entrepreneurs and others who just want to gain knowledge on what is going on. Highly recommended !

Books worth your attention. I liked this book set. I now know what to buy the first necessary things in bad times and what I already should have in your home

The first book The Death of Money is a very vital and very important book. Economic collapse is always lingering on the very edge, and one day, sooner or later, it's going to fall and we will all feel the repercussions of it, and when that day happens, it's best to be prepared for it, and this guide is the starting point to learn the basics and beginning of preparing for the day when economic Armageddon befalls us all and it will be a dog eat dog world out there, full of chaos and disorder as everyone fights everyone over everything they can get their hands on, survival of the fittest will become the order of life. So instead of being in the crowd, killing others for goods, you can be ahead of the curb and have everything you could ever need to manage in the crisis and wait it out until it hopefully blows over and the economy returns. It's not perfect, and it could have used some more depth, but it's a handy and helpful start to know and gather the basic essentials one really needs in surviving an economic disaster. The second book Debt Free is a useful and helpful book on how to prevent yourself from ever having to get into the red and end up being in debt, it gives you

handy advice on using your money wisely, which is deeply important, our resources are not unlimited, it has to be invested correctly and used sparingly. Both are great and essential books with understanding the true value of money and how to manage it, to ensure you survive economic collapse and debt.

Really interesting books. I find this subject absolutely compelling and these two books did not disappoint. With some very thought provoking theories and concepts these books will definitely give you some food for thought and move you into the direction of becoming financially more free and out of debt as quick as possible.
