Customer Reviews

My 3-year old granddaughter is learning to listen after getting cochlear implants, and loves playing the "instruments" over and over.

Good book. The only problem is the buttons to initiate the music are a little hard to push

One of my son's favorites. He is 13 months and loves reading it and pushing the buttons himself. I wish they made many others very similar to this book.

The kids love it!!

My son who is 15 months old, LOVES classical music and this book is now his favorite. He loves pressing the button to hear the various musical instruments and has now begun naming the

instruments!

I loved this book and the music, however; my 1 year old is having trouble pushing the buttons himself. There seems to be a lot of pressure you must place on them in order to make the music turn on. I know him, and he will figure it out! But it's frustrating him right now. I will still hold the torch for this book!

The sound buttons are difficult even for adults to press. My 2-year old tried to push but couldn't generate the needed force. I helped him by pushing on his finger - it required so much force it felt as if I were crushing his little finger. I ended up cutting holes in the board pages over the buttons to expose the button mechanisms. Now he can push them himself!
