Customer Reviews

Carolyn Cook has long been instrumental in providing the doll world with much needed information that has always proved to be factual and on target. We trust that you will find Carolyn's latest endeavor, Gene, to continue in this trend.

I am both pleased and honored to have been given the opportunity to work with Gene creator Mel Odom and many others in developing this first book about the phenomenon that is Gene. It is an experience I shall treasure always, and I hope you find the information and photos presented here

as wonderful as I have. To those of you who have purchased or are planning to purchase a copy of Gene go my heartfelt thanks. You have indeed played a major role in "Keeping the Dream Alive".

I loved it but wish I had purchased it earlier because of the price and can't wait for the next book to come out including everything Mel Odom did with Gene, Madra, Violet, Trent, different convention dolls and the rest. At least this one includes everything to 2001. I wish I had it before I bought some of the dolls I have as sellers don't always know what they're selling when they list dolls and think I'm nuts when I ask about accessories that aren't with a doll that supposedly is complete, mint in box, never removed, etc.

I was a little disappointed with this product. I wanted it to be more than it turned out to be, but I suppose it was okay for what it was. As a new Gene collector, I was hoping that there would be less history and more actual pictures of the various ensembles available for her and her friends, but like I said, the product was adequate, just not "super".

Charming introduction to the Gene Marshall dolls.

It had everything I was hoping for and more. I would recommend it for any Gene collector, and the price here was just right!

[ASIN:0875886051 Gene (3rd Edition) (Gene: Identification & Price Guide) This is a great book! The pictures are stunning! As is the description and time line of most every outfit and doll. I hope they come out with this sort of book every five years, starting with where they left off!

Love this doll!

Wish there was a 4th Edition.

Great!!
