Beginning Runner's Guide

Synopsis

Hal Higdon's Beginning Runner's Guide is a compact booklet (32 pages in its print edition) that tells you all you need to know about starting to run. Everything from what clothes to wear to what steps to take to how to enter your first 5-K. Beginning Runner's Guide will not tell you how to train for a marathon, but if you follow its simple instructions, it will get you to the point where you can at least consider that idea.

Customer Reviews

This book was just what I needed to answer some high-level questions. I'm heading in the right direction and will definitely seek out his other books for more detail.

I love this book because is short and direct to the point for 5K training. But disadvantage of this book has not a table or chart for running tips.

Like it

It has a lot of helpful tips to get a new runner started.

This book is an easy and to the point read. It is a great introduction to Hal Higgin and his theory on training.

Very simple to read and understand. Highly recommend for beginning runners as there are lots of practical tips and info.

Downloaded this to my kindle for iPad, and finished in about half an hour. Quick read for a newbie runner, giving me motivation and realistic expectations as I prepare for my first marathon.

Hits many of the highlights of my favorite book, Run Fast...just way less on doped work (as it should be). A good book to read prior to each cross season.
